

**I. PROJECT TITLE**

Update the Center for Roundabout Research and Training Website

**II. PROJECT DESCRIPTION**

The goal of this project is to review, edit and update the Center for Roundabout Research and Training Website [<http://transport.ksu.edu/roundabouts/>] to delete old information and incorporate current material. College of Engineering Computer Services Staff and the CE department webmaster will perform the initial revisions to the website to make it compatible with current KSU web design format.

**III. PROJECT PERSONNEL**

Dr. Eugene Russell [<http://transport.ksu.edu/roundabouts/>] will serve as the Principal Investigator for this project. Dr Russell is considered a national expert on roundabouts and has extensive knowledge of the material on the current outdated web site and what new material should be deleted, changed or added. If additional assistance is needed the K-State UTC may provide support for a GRA (or hourly worker) to assist in updating the website.

**IV. ESTIMATE OF FUNDING AND RESEARCH PERIOD**

*Period:* 1 year

*Funding:* \$4,000

**V. PROJECTED BENEFITS**

Expand the horizons of the K-State UTC and provide the UTC with enhanced National Publicity in a current research area that could attract numerous roundabout researchers, advocates and promoters to the UTC website.

**VI. POTENTIAL FOR SUSTAINED FUNDING**

There is potential for the federal highway administration or others to sometime in the future request proposals and/or provide funds for a national roundabout clearinghouse. Having a current updated website would put the K-State UTC in a position to be a strong contender for such a site.

**VII. SUBMISSION INFORMATION**

Eugene R. Russell, Ph.D., P.E.  
Department of Civil Engineering  
Kansas State University  
2118 Fieldler Hall  
Manhattan, KS 66506
